Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18, drawn to a method for operating a cache by assigning relative priority indicators to new cache entries, classified in class 711, subclass 158.

II. Claims 19-25, drawn to a cache containing both tag and data array portions, wherein the tag array contains two fields to assign priority, and address the data in the data array. The invention further selects cache addresses via a subset of address bits associated with the data and tag arrays, classified in class 711, subclass 5.

III. Claims 26-30, drawn to a system comprising a cache containing two controls bits (namely, data validity and priority), and implementing a cache replacement strategy based on the validity and priority of data previously stored within the cache, classified in class 711, subclass 133.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility from inventions II, and III such as use within a system interested in mitigating search delays within a cache by appropriately prioritizing data to be stored. Invention II has separate utility from inventions I, and III such in a system exploiting tag entries in order to more effectively address the data stored within the cache (i.e. an associative cache).

Art Unit: 2188

Invention III has separate utility from inventions I, and II such as in a system maximizing the effectiveness of a cache's replacement policy via the use of prioritization and valid/dirty bit indicators.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
